

you can make a difference!

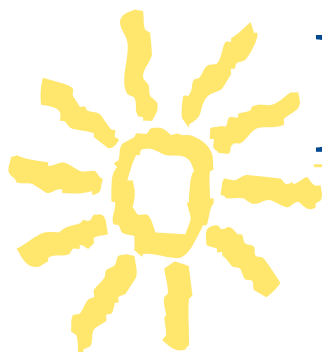

Be an organ/tissue donor • Be an organ/tissue donor • Be an organ/tissue donor

Anna was diagnosed with Biliary Atresia at just 4 weeks old. After two surgical procedures Anna got very sick, and in March 2002, at just 5 months old, she received a new liver. It has been nearly six years since the transplant and she has had very few complications. Anna is now an active kindergartener, loves school, dance and gymnastics, and wants to be a fashion designer when she grows up.

Please join the Organ/Tissue Donor Registry today and give someone else a second chance at life.
