

*Billi
Liver recipient
Sycamore*

are **YOU** registered to be
an organ/tissue donor ?

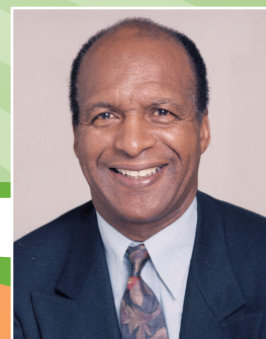

Billi was healthy and 35 weeks pregnant with her first child when things suddenly took a downward turn. She had developed a life-threatening condition called fatty liver disease and her only hope for survival was a liver transplant.

Doctors performed a c-section to save her son and put her into a coma to keep her alive while they waited for a liver. A liver was found and she survived. The next year, Billi ran in the Red Shoe Run for Donor Awareness. Her son, Jaxon, is now 4 years old and keeps his parents very busy. Another miracle made possible by transplantation.

Please join the Organ/Tissue Donor Registry today.

it's up to
YOU
