

you can make a difference!

Be an organ/tissue donor • Be an organ/tissue donor • Be an organ/tissue donor

Sisters Janice and JoAnn come from a loving family of six children. Unfortunately, both sisters as well as three siblings and their mother had polycystic kidney disease (PKD), a genetic disorder that leads to renal failure and requires kidney transplantation.

Thanks to organ donation, these sisters are now leading active, normal lives. They participated in several U.S. Transplant Games, an athletic competition for recipients of organ transplants. Janice had the honor of representing the United States at two of the World Transplant Games!

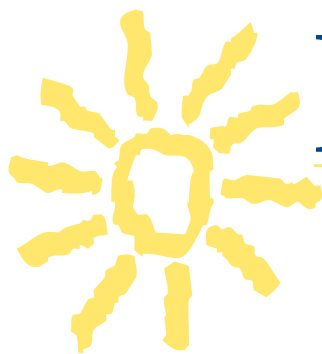

Please join the Organ/Tissue Donor Registry today and give someone else a second chance at life.

**Janice Gill &
JoAnn Villaneuva**

Kidney Recipients — Orland Park, IL

Through the generosity of organ donors, both Janice and JoAnn received kidney transplants. Janice received a kidney from a deceased donor and JoAnn received a kidney from her sister, Sue, the only sibling without PKD.
