

are **YOU** registered to be an organ/tissue donor ?

When Jerry Herbst learned nearly 40 years ago that his liver function had diminished due to hepatitis, he had no idea a lifesaving liver transplant was in his future. But in 1992, Jerry became Liver Transplant #347 at the Mayo Clinic in Rochester, Minnesota. Now, nearly 20 years later, he and his wife, Jean, spend time with their children and grandchildren thanks to the generous gift from a young woman back in 1992. Jean and Jerry have met his donor's family and were told that the donor also helped save the lives of several others.

"When you look back on everything, you realize how fortunate you are. But your donor family is always on your mind. If there were no donors, there would be no recipients."

Please join the Organ/Tissue Donor Registry today.

it's up to **YOU**
