

are **YOU** registered to be an organ/tissue donor ?

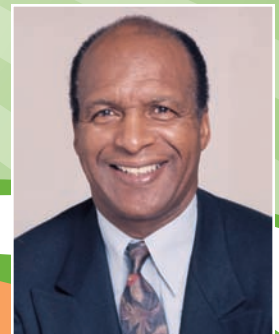

“Knowing Ryan’s wishes made our decision so much easier.”

Jay and Pat’s family had never discussed organ/tissue donation until their 19-year-old son, Ryan, told them he wanted to be a donor. They didn’t give it another thought until Ryan was killed in an auto accident and they were asked about donation. They later learned that Ryan also had talked to his co-workers about the benefits of donation. Jay and Pat felt that donation was the only thing that made sense. They are now part of a local volunteer group and share their story with other families.

Please join the Organ/Tissue Donor Registry today.

it’s up to **YOU**
